FRUSTRATE → NEST → STIFFEN → DETECT

(a) atoms & moments

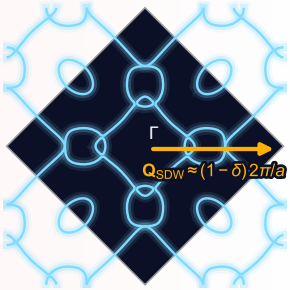

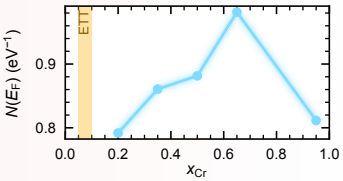

(b) electrons at E_F

Cr: jack (Γ) nests onto octahedron (H)

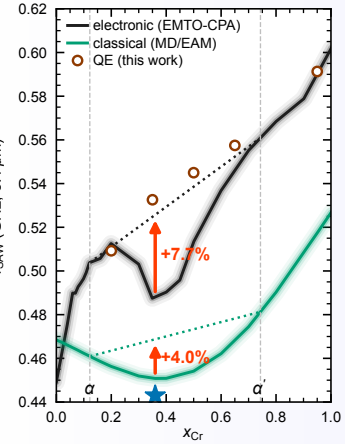

⇒ spin- and charge-density waves

(c) electron → lattice

$C = C_{ion} + C_{band}, \quad C_{band} \propto -\sum_k (\partial\varepsilon_k/\partial\eta)^2\, \delta(\varepsilon_k - E_F)$

(d) surface acoustic waves
